

SANTOSH PAL

Full Stack Developer | React.js | Angular | Node.js | Python | Agentic AI

 santosh-pal.netlify.app |  [LinkedIn](#) |  [GitHub](#) |  santoshpal9816@gmail.com

 8839102688 | 27/1 Prince Nagar, Indore, Madhya Pradesh

PROFESSIONAL SUMMARY

Full Stack Developer Having 4.5+ years of experience building and deploying scalable web applications across the MEAN and MERN stacks, using React.js, Angular, Node.js, Express.js, TypeScript, and MongoDB. Strong background in RESTful API design, Microservices and Micro Frontend (MFE) architecture, Redux/RxJS, JWT authentication, WebSockets, and CI/CD pipelines with AWS deployments (EC2, S3, Lambda). Delivered enterprise-grade solutions in Agile/Scrum teams across banking, EdTech, and telecom domains, with unit and integration testing using Jest, Jasmine, and Cypress. Currently expanding into Generative AI — LLM integration, RAG pipelines, vector databases, and prompt engineering — using Node.js and Python

TECHNICAL SKILLS

Languages	: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend	: React.js, Angular 16+, Redux, React Hooks, Context API, Bootstrap, Material
Backend	: Node.js, Express.js, REST API Design, Mongoose ODM
Database	: MongoDB, Mongoose, RESTful API Data Modelling, CRUD Operations
Architecture	: Microservices, Micro Frontend (MFE), Monolithic-to-MFE Migration
Agentic AI	: LLM Integration (OpenAI / Anthropic APIs), RAG Applications
Cloud/DevOps	: AWS, Docker, GitHub Actions, Netlify, Firebase, OnRender, FileZilla, FTP

AGENTIC AI & FULL STACK PROJECTS

AI-Powered Developer Portfolio

 [Live Demo](#) |  [GitHub](#)

- Built an **Agentic AI** resume assistant enabling recruiters to **query resumes conversationally**, powered by a **RAG (Retrieval-Augmented Generation)** pipeline with **vector embeddings** for accurate, context-aware answers.
- Developed backend using **Python (FastAPI)** and **Node.js** for orchestrating **LLM agent workflows**, document parsing, and **embedding generation & retrieval** from vector stores.
- Implemented **prompt engineering** (few-shot, system prompts) and **agentic tool-calling** to let the AI autonomously fetch, rank, and summarize relevant resume sections for recruiter queries.

PROFESSIONAL EXPERIENCE

Bank of Montreal (BMO) TCS (Client)

Diensten Tech Ltd. (Payroll) | Nov 2024 – Mar 2026

- Served as **Full Stack Developer** on the **Customer Connect** platform (Phase 2 – Account Arrangement) for Bank of Montreal (BMO), one of Canada's leading multinational banks, strengthening customer account management capabilities across its digital banking ecosystem.
- Engineered **Node.js and TypeScript backend microservices** deployed on **AWS infrastructure** for BMO's core banking service **DC-AccArrCanClose**, ensuring high availability and fault tolerance.
- Exposed and consumed **RESTful APIs** via **Express.js**, bridging **React.js** front-end modules with core banking systems.
- Extended account arrangement services to support **multi-account functionality** using **TIBCO messaging integration**, preserving secure, reliable operations for Canadian customers.
- Architected **MongoDB data models** with **Mongoose ODM** schemas to support multi-account structures while meeting **PCI-DSS** and Canadian banking compliance standards.
- Participated in **Agile/Scrum** sprints – sprint planning, code reviews, and technical design documentation – within a TCS delivery framework.

GCON – Healthcare EHR And AI Platform

Genxcellence Tech Pvt. Ltd | Feb 2024 – Jun 2024

- Developed GCON Healthcare platform with EHR integration, digital contracts, e-signature, and document management using Angular 13+, Node.js, Express.js, and TypeScript.
- Developed an **EHR-integrated healthcare platform** using Angular , Node.js, Express.js, TypeScript, and MongoDB.
- Integrated **third-party EHR APIs** with authentication, validation, error handling, retries, and webhooks.
- Built **patient records, digital documents, e-signature, multi-signer workflows, and audit trails**.
- Implemented **microservices, REST APIs, RBAC, unit testing, and performance optimization**.
- Integrated **Generative AI/LLM workflows** for document processing and workflow automation.
- Worked with **Git, Agile/Scrum, cloud deployment, troubleshooting, and production support**.

MSM Unify – QA Academy (LMS)

Genxcellence Tech Pvt. Ltd. | Aug 2022 – Feb 2024

- Contributed as **Full Stack Developer** on a **Learning Management System (LMS)** spanning **Angular,React js** front-end and **Node.js / Express.js** back-end, supporting student administration, course tracking, reporting, and automated content delivery.
- Connected **Node.js REST services** using **Express.js** and **MongoDB** for student management, course enrollment, and progress tracking, consumed by React.js dashboards.
- Implemented real-time student management dashboard widgets using **React.js, Redux**, and **Context API**, cutting data latency and sharpening UI responsiveness for administrators.
- Defined **MongoDB schemas and Mongoose models** for users, courses, and learning progress, safeguarding CRUD efficiency and data integrity.
- Produced clean, modular, well-documented code following **React.js component-driven architecture** and **Node.js MVC patterns**.
- Shipped **responsive, cross-browser-compatible** interfaces with HTML5, CSS3, Bootstrap, and Material UI.

Site-Force Layers

InnoEye Pvt. Ltd. | Jan 2021 – Aug 2022

- Contributed to Layers Modules for Site Forces, incorporating **5G network** capabilities. Enabled functionality to monitor and display site status within an autonomous networking system, sustaining reliable communication and operational efficiency.
- Functioned as **Front-End Developer**, focused on **Micro Frontend (MFE) Architecture** to construct scalable, maintainable web applications.
- Split monolithic front-end systems into **independently deployable modules**, accelerating development velocity, team autonomy, and adoption of new technologies.
- Wired up REST APIs per business requirements and relied on **Git** for version-controlled, collaborative development.

KEY HIGHLIGHTS

- **4.5+ years** of Full stack developer across banking, EdTech, and telecom domains.
- Expert in **React.js ,Angular** with Redux, Redux Toolkit, React Hooks, and component-driven architecture; strong **Node.js + Express.js** backend skills.
- Proficient in **MongoDB** schema design, Mongoose ODM, REST API development, and TypeScript across the full MERN stack.
- Proven Agile delivery for top-tier enterprise clients including **Bank of Montreal (BMO)** via TCS.
- Actively integrating **Generative AI** (LLM, RAG, Prompt Engineering) into Node.js / MERN Stack applications.
